**American Concrete Pumping Association**  
*Founding Association*

WeAre**Safer**Together.org

Concrete placement plays an integral role in the day-to-day activities for concrete contractors. Many variables and degrees of responsibility are based on scope of work and parties involved. The ACPA jobsite safety awareness campaign helps communicate the responsibilities to those who own, operate and work around concrete pumps. This campaign strives to ensure those involved are aware of the related hazards and understand their roles and responsibilities under the ASME B30.27 standard to ensure safe work conditions and practices are met. The American Society of Concrete Contractors is proud to partner with ACPA, a committed industry partner, to help spread awareness around job site safety

**Joe Whiteman**  
**ASCC Director of Safety Services**

**WeAreSaferTogether.org**

High pressure and tight schedules require increasing awareness of the standards and practices that help keep workers safe. We've seen too many significant injuries on projects, even by safety-conscious contractors. The Concrete Foundations Association is proud to support this critically important job site safety campaign and spread the message about the B30.27 standard to anybody who owns, operates or works around concrete pumps

**James Baty**  
**CFA Executive Director of**

**WeAreSaferTogether.org**

Increasing awareness of the standards and practices that help keep workers safe is an ongoing part of our commitment to the future of this industry. The Tilt-Up Concrete Association supports this imperative job site safety campaign, which highlights each trade's responsibilities under B30.27. We will be an active partner to spread the message to anybody who owns, operates or works around concrete pumps – significant contributors to the growth of tilt-up construction.

**Mitch Bloomquist**  
**TCA Executive Director**

**WeAreSaferTogether.org**

At Joseph J. Albanese, we are fully devoted to our mission of 'Getting It Done Safely!' This is why we support this incredibly important job site safety campaign. When each trade understands their responsibilities under B30.27 when working with or around a concrete pump, the entire job site is safer."

**John Messing**  
**JJA Safety Director**

**WeAreSaferTogether.org**

The National Ready Mixed Concrete Association estimates that the US produced more than 400 million cubic yards of concrete in 2022.

- Residential
- Commercial
- Infrastructure

PREVENT. PROTECT. PARTNER!

WeAreSaferTogether.org

**The American Concrete Pumping Association estimates there are more than 10,000 truck-mounted and trailer-mounted concrete pumps.**

**Each pump is accompanied by a trained (and ideally certified) operator.**

**WeAreSaferTogether.org**

**PREVENT. PROTECT. PARTNER!**

More than 30,000 mixer drivers and 10,000 site supervisors and inspectors work around the “back-end” of a concrete pump every day.

WeAreSaferTogether.org

PREVENT. PROTECT. PARTNER!

**More than 300,000  
construction workers  
work within 100 feet of  
a concrete pump every  
day.**

**2.4 million man-hours  
of exposure and risk  
every day.**

**WeAreSaferTogether.org**

**PREVENT. PROTECT. PARTNER!**

Ready mix concrete weights 4,000+ pounds per cubic yard.

Concrete pumps are placing the concrete anywhere from 10 to more than 100 cubic yards per hour.

WeAreSaferTogether.org

PREVENT. PROTECT. PARTNER!

For truck-mounted boom pumps that can reach more than 200 feet, outrigger ground pressures exceed 100,000 LBF.
